

BUILD A CAR FOR ME!

GEEKS FOR KIDS 2021 **HELP KIDS WITH MOVEMENT LIMITATIONS**

Over 500,000 American kids under the age of five have mobility problems. They often can't run and play with other kids, and this limits their development. Geeks for Kids changes that! Join us in building hot rods that get these kids moving - and make them the coolest kids on the block!

Put your skills to good use: build hot rods for kids with movement disabilities. There are lots of ways to plug in! Whatever your skills – from engineering, programming, robotics, physical and occupational therapy, sewing, design, project management or just willing a hand – we need your help! Or, sponsor Geeks for Kids or donate a car. It takes a village to build these cars.

Sign up today! For more information, visit:

The Details

The Prep Parties

Saturdays,
February 13, March 6 & 27,
April 17 & 24
9a to 1p

The High-Tech Builds

Saturdays,
February 13, March 6 & 27,
April 17 & 24
12 to 4:30p

Delivery Day Celebration

Saturday, May 29
1 to 3p

THANKS TO YOU...

THE 2020 GEEKS FOR KIDS WAS A HUGE SUCCESS!

- 11 months
- 51 strategy, design, build and delivery sessions
- 155 volunteers
- 12 corporate sponsors plus dozens of individual donors
- Over 10,700 labor hours
- Over \$79,000
- 30 kids got the Power 2 play in:
- 8 hand-driven cars for kids with lower-body movement disabilities
- 18 joystick- and remote control-driven cars for kids with limited upper and lower body strength
- 2 control panel- and remote-control driven cars
- 1 head- and remote-control driven car
- And, endless joy and new opportunities for all the kids who received cars
