

NEED A CAR? APPLY!

GEEKS FOR KIDS

Building Cars for Kids with Movement Limitations

We design and build custom, electric, ride-on cars and other assistive devices for kids with movement limitations. If you have or know of a child who cannot easily move about and explore, we would love to help. We serve kids with have difficulty moving around and who weigh up to approximately 80 pounds.

The cars are a gift. There is no cost to you or your child. You only need to apply, meet with us to discuss your child's needs, and review our designs. If you like, you can also participate in the building of your child's car. (Our all-volunteer team can use all the help it can get.) Then, join us on Delivery Day where we will do a final fitting, teach you how to use the car and do a test drive.

Apply for a car today! It's easy. Go to the link below, and fill out the form. It only takes about 5 minutes. We accept every application, provided we can meet your child's needs and can raise the money to cover the costs.

Geeks.LearnScienceAndMathClub.org/apply-for-a-car

A local not-for-profit, providing STEM enrichment program for kids 5 to 21 invites you to make a difference in our kids' lives. Get involved today - build, sponsor or donate!
